

## Case Study Submission Requirements: Gynecologic Ultrasound with Adjunct Competence in 3D

Refer to the Accreditation Application Manual for additional case study submission requirements.

Cases in which a patient has had a hysterectomy or oophorectomy are <u>not acceptable</u> for submission.

Click to Download GYN Case Study Templates for PowerPoint

Applying for GYN with 3D (may be used to fulfill standard GYN case study requirement)

- From the <u>main site</u>: submit 4 complete standard TRANSVAGINAL gynecologic cases with their corresponding final reports <u>which include</u> a demonstration and interpretation of the additional images referenced below\*
- From <u>each additional site</u> or <u>mobile unit</u>: submit 1 complete standard TRANSVAGINAL gynecologic case with its corresponding final report <u>which includes</u> a demonstration and interpretation of the additional images referenced below\*

\* <u>3D Image Requirements & Acquisition/Submission Demonstration</u> (← click me)

- **Image 1**: Acquisition image demonstrating the uterus in three orthogonal planes.
- <u>Image 2</u>: Reconstructed CORONAL view of the uterus in a single image.

## **Gynecologic Ultrasound with Adjunct Competence in 3D Imaging Checklist**

## GYN with 3D

## Labeled images of the following:

- □ 1. Uterus sufficient images to show orientation and rule out masses and other abnormalities (at least 2 orthogonal planes)
- $\Box$  2. Uterus measured in 3 dimensions
- □ 3. Endometrium
- □ 4. Measurement of endometrium
- □ 5. Cervix
- □ 6. Cul-de-sac
- □ 7. RIGHT ovary measured in 3 dimensions obtained in 2 orthogonal planes
- □ 8. LEFT ovary measured in 3 dimensions obtained in 2 orthogonal planes
- 9. Acquisition image demonstrating the uterus in 3 orthogonal planes\*
- 10. Reconstructed CORONAL view of the uterus in a single image - this view should demonstrate the outer contour of the uterus and the inner endometrial shape\*
