

# Gynecologic Case Submission Requirements

<b>Applying for GYN (without 3D):</b>	
<b>From the main site:</b>	<b>From <u>each additional site</u> or <u>mobile unit</u>:</b>
Submit a total of 4 complete gynecologic cases with corresponding final reports, 2 of which must have been performed transvaginally.	Submit 1 complete gynecologic case study with corresponding final report.
<b>Applying for GYN <u>with</u> 3D Adjunct:</b> (may be used to fulfill GYN case study requirement)	
<b>From the main site:</b>	<b>From <u>each additional site</u> or <u>mobile unit</u>:</b>
<p>Submit with their corresponding reports a total of 4 complete (standard) TRANSVAGINAL gynecologic cases <u>which include</u> a demonstration of the reconstructed coronal view of the uterus:</p> <ul style="list-style-type: none"> <li>• <b>Image 1:</b> Acquisition image demonstrating the uterus in three orthogonal planes.</li> <li>• <b>Image 2:</b> Reconstructed CORONAL view of the uterus in a single image.</li> </ul> <p style="text-align: center;"><b>3D Image Acquisition and Submission Demonstration:</b>  <a href="http://www.aium.org/accreditation/caseStudyRequirements/gynAdj3D.pdf">http://www.aium.org/accreditation/caseStudyRequirements/gynAdj3D.pdf</a></p>	<p>Submit 1 complete (standard) TRANSVAGINAL gynecological case study <u>which includes</u> a demonstration of the reconstructed coronal view of the uterus with a corresponding final report:</p> <p style="text-align: center;">← must include images <u>1</u> &amp; <u>2</u> as listed under the main site (left)</p>
<b>All cases must follow the <u>General Requirements for the Submission of Case Studies</u></b> <a href="http://www.aium.org/accreditation/gencasereq.pdf">http://www.aium.org/accreditation/gencasereq.pdf</a>	
<p><b>Note:</b></p> <p>Cases in which a patient has had a hysterectomy or oophorectomy are <b><u>NOT ACCEPTABLE</u></b> for submission.</p> <p>For the purpose of accreditation, all anatomy must be appropriately labeled (for example – LONG UT).</p>	

# Gynecologic Imaging Checklist

<b>GYN (standard exam)</b>		
<i>Labeled images of the following:</i>		
1. Uterus – sufficient images to show orientation and rule out masses and other abnormalities (at least 2 orthogonal planes)	2. Uterus measured in 3 dimensions	3. Endometrium
4. Measurement of endometrium	5. Cervix	6. Cul-de-sac
7. RIGHT ovary measured in 3 dimensions obtained in 2 orthogonal planes	8. LEFT ovary measured in 3 dimensions obtained in 2 orthogonal planes	
<b>If applying for GYN with Adjunct Competence in 3D, perform the standard exam (<i>above</i>) and include:</b>		
<i>Labeled images of the following:</i>		
1. Acquisition image demonstrating the uterus in 3 orthogonal planes	2. Reconstructed CORONAL view of the uterus in a single image - this view should demonstrate the outer contour of the uterus and the inner endometrial shape	
<p>Follow the link below for additional information about Adjunct Competence in 3D GYN:  <a href="http://www.aium.org/accreditation/caseStudyRequirements/gynAdj3D.pdf">http://www.aium.org/accreditation/caseStudyRequirements/gynAdj3D.pdf</a></p>
