Case Study Submission Requirements: Gynecologic Ultrasound with Adjunct Competence in 3D

Cases in which a patient has had a hysterectomy or oophorectomy are not acceptable for submission.

Applying for GYN with 3D
(may be used to fulfill standard GYN case study requirement)

- **From the main site:** submit 4 complete standard TRANSVAGINAL gynecologic cases with their corresponding final reports which include a demonstration and interpretation of the additional images referenced below*

- **From each additional site or mobile unit:** submit 1 complete standard TRANSVAGINAL gynecologic case with its corresponding final report which includes a demonstration and interpretation of the additional images referenced below*

* **3D Image Requirements & Acquisition/Submission Demonstration** (← *click me*)

- **Image 1:** Acquisition image demonstrating the uterus in three orthogonal planes.

- **Image 2:** Reconstructed CORONAL view of the uterus in a single image.

Gynecologic Ultrasound with Adjunct Competence in 3D Imaging Checklist
GYN with 3D
Labeled images of the following:

☐ 1. Uterus – sufficient images to show orientation and rule out masses and other abnormalities (at least 2 orthogonal planes)

☐ 2. Uterus measured in 3 dimensions

☐ 3. Endometrium

☐ 4. Measurement of endometrium

☐ 5. Cervix

☐ 6. Cul-de-sac

☐ 7. RIGHT ovary measured in 3 dimensions obtained in 2 orthogonal planes

☐ 8. LEFT ovary measured in 3 dimensions obtained in 2 orthogonal planes

☐ 9. Acquisition image demonstrating the uterus in 3 orthogonal planes*

☐ 10. Reconstructed CORONAL view of the uterus in a single image - this view should demonstrate the outer contour of the uterus and the inner endometrial shape*
